Barcelona, Spain

Software engineer with a competitive programming background (ICPC World Finals) and 5+ years shipping production software. Currently frontend on zara.com, one of the world's largest e-commerce platforms. I care deeply about performance and accessibility at scale, and have delivered full stack work with .NET and Node across earlier projects.

COMPETITIVE PROGRAMMING

ICPC World Finalist

46th World Finals · Luxor, Egypt

EDUCATION

Double M.Sc.

Frontend Dev & Computer Science · Harbour.Space

SHIPPING AT SCALE

zara.com

Frontend on one of the world's largest e-commerce sites

EXPERIENCE

Napptilus Tech Labs

Dec 2022 - Present

Full Stack Developer

- Zara.com / Inditex: Develop and maintain the official zara.com storefront and 6+ internal repositories for a platform serving millions of users daily. Worked extensively on accessibility improvements to make the shopping experience usable for customers with disabilities, and on performance-critical interfaces at scale.
- Slalom: Owned the migration from Vue to Nuxt, modernizing the codebase and improving rendering performance. Led development of the back office and backend services with .NET 8 / C#, delivering the full stack end to end.
- Napptilus corporate site: Led design and development of the company's own website, improving SEO and load performance while modernizing the brand presence with motion design and animations.
- TrackCO2: Built a B2B platform connecting companies with carbon credit project developers, implementing real-time dashboards and document verification flows to guarantee full traceability of environmental assets.
- Federació Catalana d'Hípica: Built the backend for the Catalan Equestrian Federation's platform with Node.js, developing APIs and server-side logic.
- Nappai: Built the public-facing frontend for an AI platform with Astro and React, focused on performance and polish.
- Stage in Home: Full stack work on an AI-powered virtual home staging tool: frontend plus backend services and APIs with .NET 8 / C#, integrating image generation pipelines and property management workflows.

`Vue.js` `Nuxt.js` `React` `TypeScript` `Redux Toolkit` `Pinia` `Astro` `Strapi` `Nest.js` `Tailwind` `.NET 6/8` `C#`

Luna Geoespacial

Aug 2021 - Sep 2022

Frontend Developer

- NatureCounts (Birds Canada): Contributed to one of the world's largest biodiversity data repositories, developing interactive data visualization interfaces for ornithological research used by scientists globally.

BEYOND WORK

Competitive Programming

ICPC World Finalist · UCI Team

- Competed at the 46th ICPC World Finals, after years of training in algorithms, data structures and problem-solving under pressure.

SKILLS

CS FUNDAMENTALS

`Algorithms` `Data Structures` `Dynamic Programming` `C++` `Python`

FRONTEND

`React` `Vue.js` `TypeScript` `Nuxt.js` `Astro` `Quasar` `Tailwind` `Accessibility (a11y)` `SEO & Performance` `Redux Toolkit` `Zustand` `Pinia` `Vuex`

BACKEND & DATA

`.NET 6/8` `C#` `Node.js` `Nest.js` `Strapi` `Laravel` `REST APIs` `PostgreSQL` `MongoDB`

TOOLS

`Git / GitHub` `Claude Code` `Figma`

EDUCATION

Double M.Sc.

Harbour.Space University

- Frontend Development
- Computer Science
- Barcelona, Spain

Computer Science Engineering

Universidad de las Ciencias Informáticas

- ICPC World Finals participant, 46th edition, Luxor
- Programming team member & competitor

LANGUAGES

→ Leagues of Code (2023 - present): teach programming to children weekly; breaking down complex concepts is a skill that transfers directly to technical communication.

Spanish	Native
English	C1 / Advanced (EF SET)
